

Keeping You Safe Since 1970

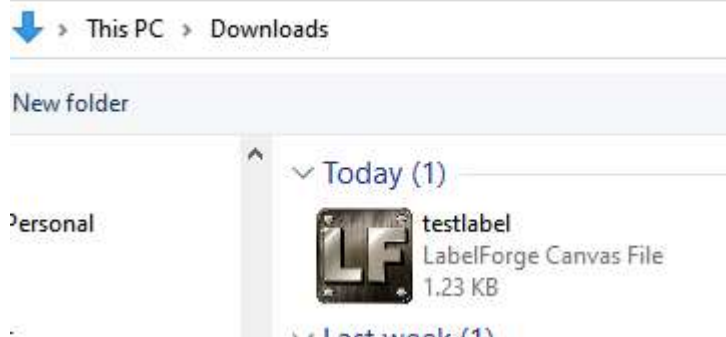

## Converting Labels from Labelforge to Labelforge Pro

In order to convert Labelforge files to Labelforge Pro, you'll want to do the following:

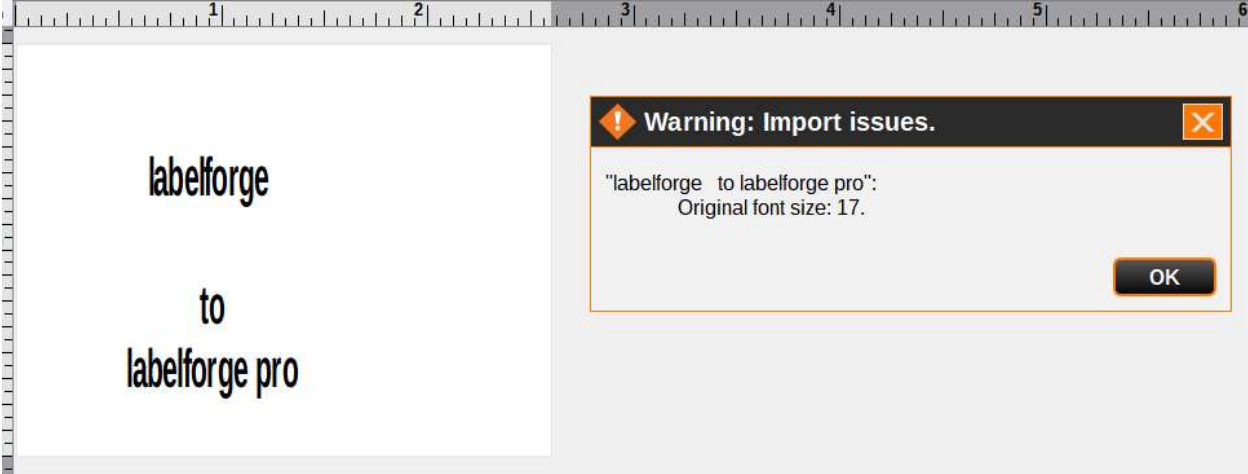

- Open Labelforge Pro
- Select **Label Designer**

- Select the three lines at the top left, and then select **Import**
- Select your Labelforge file

Once completed, your label will be pulled into Labelforge Pro. If there were any import issues, you will get a popup letting you know what needs to be readjusted.

From there, you can save your label and print from Labelforge Pro.
